Notes re A.B.

(1) Has hotel registration @ New Yorker, March and 1942
(2) ever turned up? Name Harry Gold (A.B.?) Placed in file Feb 1958

(3) H.G. will not appear antagonistic to A.B.

(4) Re relations of A.B. & Mochly - H.G. intends to stay of this until Defense Atty opens up on me, then:

a. M. told Naomi & failing to poison H.G., turned on me - ditto for old email & file sitting down side. H.G. found out that she was with an old woman heavily involved about withdrawal of money for only daughter had married.

b. Talk about office with idea! Mochly's date put firm on matters before A.B. left for Philad. Even when out with me there Mochly told it (because it represented Naomi) & could not get back to N.Y. quick enough. would meet at the Philad with Naomi two days

c. A.B. would of the news Mochly down to me
d. Vandalism, all his bits returning from Philad after the CIA's party in late Oct. 1946. Hoped all would not show up. Then H.G.'s surprise to find them something that coming on return from library.

(5) A.B. said Mochly dealt with negro C.P. & H. members.
(6) A.B.'s statement that some of later enemies body given Mochly's sub. list - Sus, over etc (see below).

(7) d. Mochly disliked in succession (4 reasons for each)
(1) Jules - did not contribute to firm & drew retainer salary (\$50/wk)
(2) Oscar - wanted regular salary & was always inquiring (with H.G. & Mochly)
(3) Lind - got back dough he put in firm when he left salary

(8) M. Sus - disliked Mochly because of her campaigns on with
(9) A.B. - is it had to go. Fortunately for her, she was a physicist & was really not suited to direct lab. But she was immensely capable & could have been worked in

(10) (a) H. not there on - talked a bit with to do re conduct of business
(11) Holman Libbertson - asked for done etc - over time
(12) Sol Frankel - got tuff about union, then only worked few weeks without pay. (Jules Mochly liked him because of C.I.)
(13) Phil Levin - asked A.B. to have Mochly stop interfering in conduct of lab, also objected to A.B.'s conduct of business

(14) (a) P. D. Miller - running A.B. for \$50,000 in later 1947

① di... - she talked her into this:

Notes re A.D.

⑤ Marby's dated of H.G. - never really realized how resented it was & how great was her resentfulness & distress - only of H.G. a letter from her. Three reasons for Marby's dislike of H.G.:

① a. my efforts (starting ^{from June}) to get out to spend more time & money (with Naomi's children) + my striving desire of complete affairs they were carrying on (H.G. succeeded in this on top of this)

b. A.D. & Marby had H.G. & H.G. because of our price with for S.U. - and A.D. & Marby, considering my and my firm's business affairs.

c. A.D. & Marby to have H.G. around when he worked - he claimed & aided him immensely. Plus A.D.'s desire to work with H.G. in lab. - out of about 1941 (a & b & c)

⑤ + ③ + ⑥ ① + ② Marby & all

① a. C. & Marby able to show off this stuff (Marby's brain on early things from chemistry to physics to world affairs to demeriting atomic bomb & nuclear disasters) before company.

b. A.D. & Marby run firm (Marby & A.D. were not consulted till they were ready to announce their decision); rather, A.D. would drive Marby home & would convince her of decisions on her own way.

c. A.D. & Marby build off company's till - a part on front of not drawing salaries in this last partly travel Marby, but all paid for her expenses (including gas) + station on firm (Marby's C. & P. sale - Black Canyon).

① d. Low affairs

(1) Marby in with Marby @ 151 in July & then August

(2) Parkhill in late June - to work on Vail next.

(3) Returning from Parkhill in Aug 1946 quit by take Marby to arrive at the Natchez in Greenwith Village. H.G. along & Marby told it - but with able reason for Naomi (H.G. till and get to N.Y.) was to work @ Vail next.

① e. Buying more clothes for out - a plan to take Naomi along. Re plan & Parkhill & de mandellon. 29-30-40

- ① H.B. deliberately worked date ② date to avoid working date
on circus tensions (this was by July 4 and 1946 & continuing
until I left IIR 2nd time.)
- ③ Re working & business H.B. assets cost & stock - attorney ③
arrangement. Also it says he was to send (to laborer) to
buy these for H.B.
- ④ H.B. never trusted working, any best in relation to ^{for} ~~working~~
decisions & great for me to talk. But was always worried that
A.D. told all to her. It was what she might do in a violent outbreak ^{transfer the} of ~~working~~ H.
⑤ working's division of A.D.'s idea of a little court - but A.D. was
the only person; when it came down to cases he was a
capitalist & a tough guy - Republican & contract; also got 4
F.A.E.C.T. - & A.D.'s opposition to it.
- ⑥ working's statement Newspaper - H.B. didn't want another of all
elements D.A.D.A. - effort to help H.B. from talking.
- ⑦ Working must have understood working he could do all
nothing on one (as vs. fully, or even less).
- ⑧ working's story of being trailed after going to see Abby N. on occasion
of first visit of Sherman & O'Brien. Also, entering into late girl follow-
ing out of J & O'Brien.
- ⑨ H.B. tho' could go to N.Y.C., but possibly he could break up
the affair with A.D. & working, the idea being that sooner or later
working's vicious temper would take her too far in hurting A.D.'s
pride. (quote O'Bill Ricker's "you are similar!" Face it,
you're a fucker!" Over try to put one over on me" & quote
working, also "The \$3 dollars in your pocket now - you borrowed
from me (oh?)")

Notes Re A.D.

For Defense Atty

a. Need to tell facts that's all. No idea of determining any substance only way I can really make sense is to summarize (over if possible) with out U.S. knowledge rec'd from date on

A.E. given H.B. by Facts - plus date rec'd from A.D. & A.D.S.

b. Do I hate A.D. - no. only feel sorrow for what we have all created for ourselves. like people, rather than dislike them. I would do will do anything for them - literally, M.E.D. & down.

with facts. A.D. & down. only exception is Nazis & points

- term synonymous with esp. - old terror, a.S.

c. "H.B. intelligence man" - out judge's planning & my "stop button" on my "let's proceed" facts; hard, uncontrovertible ones.

d. If I could buy some with old funds - how that is wrong A.D. is mind worked. He wanted \$100 to work for firm to that of 20 or 30 thousand dollars. Felt in with 4/19/46 and 1942. (Vaporizer, Submarine currency, A.D.A. in Aug 1944 - reason for War under rule.) and getting of Senator @ his attempts to get to Chicago.

e. H.B. did only when specifically ordered to, & that used to a

man in - because it was too late to keep track of them

f. under fixation - mostly's idea

g. He mainly spending dough on H.B.

h. H.B. broke out 3rd after Aug 1946 not pay brought home to

i. continue more to deal at mostly's than at I had place of my own (Pd rent & bought food all time was there).

j. report yes (re mostly taking me in) but blame for fact and I realized that there factitious family since 4-4 trip and up. Plus A.D. going to country & T.V. re Vitamin contract.

k. could not get away from her fact bluff & all over and in factious fight. I did not like it. But was broke a

Notes re A.B.

always advised as I often met, was

summary of 1947 - A.B. arrested on 11/11/47 (his last for com-
pany) - he was an orderly, sent H.G. to jail 5:46 AM, then the
jail tail was until H.G. was let out @ 9 AM. From the company
did not like this discipline Mary staying at A.B.'s (in water-
fired with her love affair); & soon A.B. took to sleeping @ 151
again (as in 1946).

ii - H.G. borrowed from Mill in Jan 1948 due to A.B. not leaving
up to promise of selling A.B. to H.G. & Norman.

iii - H.G. & desire to please the liked people - & going all out for
them. Partly due to fascination @ A.B.'s undoubted ability, also
tendency on part of H.G. to make excuses for others & put up
with a obvious observations & decentered his in fact that
things would eventually work themselves out. H.G. & S. reached
them ready to quit up on A.B. & H.G. could not translate
a need to help (at least mitigation). Big morale to
me - How someone like A.B. can get into this?

(2) - re A.B.'s conduct in presence of presence

a - Promising to demonstrate processes and make beds - & H.G. working
in his/day to develop them (leaving A.B. @ 9 AM & 5 AM & 10 PM)
of every night back to work) & small deadline. process

b - Promises of completing work (mostly in "thousand feet" re
deadline for Tony & W. W.) & promise in Nov @ Peckhill to
T & W - when started in till April, in meantime worked
on rail process & methacrylate. General with Elvira
& Ch. should be P.E.T.N. with biggest of all - Stanton job!

c - A.B.'s promises (in his word) @ taking appointments re
business - Tony & W. W. & Johnny V. (Day of Columbia -
Army ground of 1946 - Marched 6 km down - following 100 -
& Army blocking). Peter & Ch. & met re A.B. & process

that H & could not work @ ADA unless he were a C.P. member - "sure they wouldn't demand it." Later Tom & Victoria gather

9 AD - story of Nicholas's attempt to do deal as an afterthought - mentioned in front of Morley & H's prior to his going before Ad. jury (place? arriving out to Texas)

10 AD & H.E. story of selling explosion @ airport (AD's question re flight & H's ability to answer). Effort to throw AD off track (H & could prove & was in Africa @ this time - July 16, 1942) why I told AD all - the purpose of H & H's exhaustion (working till 5 or 4 AM & after all this & 12 miles in a row) when questioned. AD. Conspiracy to get hold on me? Idea of AD's early 1947 that I couldn't leave ADA - and had to be together were we questioned again.

11 AD & Polish activities & went to train on ADA going to Poland. H's name omitted without his permission. Phil Lewis can testify to H's opposition to this idea.

article of NY Times re Potemkin

12 AD & Communist activities
a. Early story of Y.C.L. @ Columbia (student only with a portion - good list of Y.C.L. members to train - as they could get into red school. AD's victory of his throwing Chad King down a flight of steps @ Chandler Hall)
b. Episode in NY - Fordham students (football) & history. Reception of parents of one in face. AD & talks with Press @ Fordham U.

c. national threat & army of soldiers directly directed to H - AD's intention of being better with right bills - the story of being black & blue all over body.

13 AD & face on H & H's joining AD. "people the world think it" - unless H's were C.P. members. Mocking of El Mandelhorn; ditto not person - with reason AD's money & ^{with reason AD's money & ^{with reason AD's money &}}

d. Two hair long dummies while AD. expounded on his theories of down-fall of capitalism in U.S. (frenzied death-throes H & stated that should be done much time about (plus load of other in his which I directed). Even re taking H's down date at night - would have been easier to wait for bus & leaving. Franklin letters particularly in hand.

(C) A.D.'s alleged statements in 1944 all go much along the line of "I'm out of it" - he taking up CP work. Communist needs to make a good deal out of the hell, does he think he is accomplishing anything by standing on corner & selling D.W.? Tell him to get a job with Goodrich or the number - where we can get valuable information on his little rummy. His idea - A.D. was on leave from C.P. to do some work with probably, plus, A.D. was blaming Communist that he was backing up among the re obtaining D.W. backing.

For U.S. aty. - Pierre des Hotel

(5) a - Pierre des Hotel known as F.K.

A.D. 4 was with army of Republic of Cuba.

Notes re A.B.

(5) A.D. + H.G. - Early (S.H. W.R.)

From very faint H.G. records clearly that A.D.'s erratic conduct & failure to keep appointments & commitments were all wrong. Particularly, most of contacts marked as if, A.D.S. W. A.D. was the first one I had met & H.G. was & as I continued to hear with time and time that something would come out of it. Had anyone followed A.D., someone of his abnormal character, and as, H.G. would not have made the same mistake again.

Re erratic conduct on leaving, rendezvous, missed first two & I made excuses for him (for me at least) but did say that reason I was being assigned to handle A.D. was because it was thought that due to our both being chemists - with a lot of common interests - I might, therefore, succeed in straightening him out. Had I done really known how impossible A.D. really was, all contacts with him would have been broken, at that and did seriously discuss (on at least two occasions) the possibility of dropping him & and later I was afraid as to what he would do next - in my mind. Must for reason of being so busy with A.D.S. & P.S. Co. work, I never got around to it - I did inquire, however, into:

(1) Oct 27 Oct 6 & 7 - after two (possibly three miles) one H.G. went to downtown @ church?

(2) 1/2 an acre @ child's column in cell

(3) Ray & Ray & church (shadow 7 mile station) & K. K. & Ray -

always made head on several occasions, against not heavy driver.

Why @ Ray & church for the same - calls, how I got to know until water's voice. P.S. Co. & P. S. Co. - not clear, later

@ elementary - Ray & church was out to this. Why P. S. Co. & K. K. & Ray -

company near his and @ 4500 ft. Regal case was wrong, but this time I declined all's invitation to come out to

Ray & church (invo busy with K.F.; besides 4500 ft. & down town

not to all all - Ray's previous order - plus fact that I had been

in front top of the in the past). I knew it would be a pretty

trip in which all that would be accomplished would be

disturbing to long haul on all it trouble - & down it was being put upon by his co-workers & business associates.

Notes re A.D.

(2) Opportunity for idea of a new firm by also doing to make good on this ref. Talk world of industry & business

(3) Even before this, demand is as talk re withdrawal efforts due to invasion of Russia by Germany (again concept of fight against a-f).

(4) Also, quit as was ready to end up A.D. came there re the notes on Deane & missing Cpt (Hendrick stuff all in rest, no mention of this being A.D.'s own property). Also re H.G. Powell & several names, both were very close connections of J. I. had saying A.D. would not financially trouble on both. Recall early Commodore Hotel 1945 (April or Fall). Re H.G. Powell, after June 1944 nothing done on civil service (cash date on letter).

d. Come down to A.D. re A.E. work in 1945. Not right and however, could be mistaken as that A.D. was always paying H.G. best funding than H.G.; also H.G. very nervous & saw nothing with A.D. in 1945 (did not see A.D. from July to years).

(14) A.D. & H.G. - later (re ADA)

a. My mistake - going thru: remove Navy to concentration - Mr. Rowland. Plus actual in real state of work over long 17-42. Sub of 1945.
b. A.D. & story re Karch contract on draft, plus - found del. de. Also investigated plus work, substitute for steel - in auto bodies. A.D. said that his secretary contract (actually "other" contract) decided on having an auto contract, & H.G. fell for this rather story. The truth however was his desire to get rid of this work because of such outrageous criticism of A.D.'s affair with money (actually it was this of person who had sponsored her).

c. H.G. know from first and to that that was my error - due to fact that I could not call up his re family in definite Tel. Plus fear of A.D.'s dislike ADA's name as a project a difficulty. Plus liking for Karch. Plus A.D.'s fear & anything. ^{Plus C.P. Tel}

d. But soon got involved in old advertisement for chemistry - re big bang, got us all around, and of strong all A.D. contact on outside.

e. Added to the above...

① possibility of H in evidence re A.E. and A.P.S. & back to 1955 -
whole house of cards coming tumbling down, rather similar to
tangled mass of my life (dis. & destruction of falsehood) - all the
had to occur in for me called to become exposed & when an
investigative agent called, the whole doubly twisted chain
would eventually come unravelled, and this is precisely
what happened - by 1947 or after an interlude in which
thought I was safe - ending in one or of this year.

10-26-50

notes re A.D.

no amount of heartbreak & effort & sweat into firm (over, & lot of work & salt & oil sweat & this) that I just could not deal till I heard the firm was on a solid financial footing.

I - Paul had I fully intended to do because of:

(1) woman's reputation for any day - I - with wife P.A.S.A. - I would come home exhausted & feel "died" on dining - room couch, man. You look like a walking ghost - & a barely vertical one at that.

(2) Fear of C.P. connections of all leading to exposure of H.G.

(3) murky & all affair - He realized he could never make it and that Naomi & all & I just wanted to get rid of ourselves & business - I did not want to be around, I was so worried by it rather, anxiety.

q - A.D. is provider of big contracts: U.S.I., the Union, I.C.I. & Longue - Plus selling to Norman. I did not see much work though (in fact it's always thought he could not be taken down by signing statement regarding he was giving up all claims to both pay & royalties) and, seeing things @ A.S.A. etc.; thus, getting out of A.D. because of "if" about.

he - at that I would probably not have raised full in late spring of 1948 (when also minimum went to Longue) and all was for summer (and/or) created by Naomi & Paul & over. Even then I still wanted to work for two more in late getting all & data records but A.D. called on him & said location does not work. Walter Gannett can verify this.

(3) For U.S. attorney:

a - Re A.D. & Frank Keller alias of H.G. (found name to pick the - Keller name to go home going to N.Y. - after war time). A.D. always told I was F.K. & that I used H.G. as alias re attorney. P.G. associates & Dr. Levin involved, used H.G. as de the (telegrams) drops; A.D. did not know any about me, or even me, to borrow money; but, to get date with date & something in them and - other. It was not until late spring of 1946 (6 or so at 114 E. 114th St. N.Y.C.), when I told him that I was actually H.G., that he became aware of this fact. Notes re A.D.

- (4) Jan 1, 1940. New York day & evening outside closed & dark - all day, but to look for sign of life. Later A.D. driving H.B. up cleared the way along Hudson River. At Muncie, S. 9-1-40
- (5) Jan when H.B. & A.D. working over mining data in Oct 1940 (Cold - for this one, clear, with) & Princeton Feb 1940. Entering Canal oil after New Yr. 1940.
- (6) Today an accident all's incident reaction re accident of Cant will Reel. A.D. & Co. late from or early fully 1940.
- (7) To all of above there would have been an overall reaction & demand of kind on part of H.B. re all's arbitrary, high-handed or utterly selfish conduct - to others as well as H.B. plus an incident such as A.D.'s proposed trip to Lanes 70 miles from N.Y. for purpose of authority on Muncie & Reed. All's demand re friends at house during with Class, 9-1-40 Feb 1940.
- (8) Re completion Muncie & Reed data in 1940 - just before H.B. scheduled induction into Army - April 21, 1940.

C. re mining data - all Hendrick monographs, blueprints, technical data & literature for various chemical industries. In early 1940
 Demmer got requests from S.M. for further info on a certain tract
 Technical-type agitator & A.D. could not get it (after putting out
 off) saying that it was in Hendrick office - no mention in 1940
 or so or name body of this report about that being a solo effort by
 A.D.; Demmer & S.M. would not have liked this (in fact, they
 would have taken any hide off) had it been merely A.D.'s
 creation. Beyond on all revelation for U.S. Technical shall
 plus idea of accident on a process already in operation as
 opposed to one which was in the nature of an innovation
 (or was just in the early stage); plus frequent derisive
 comments re all's own work - they wanted Hendrick, U.S. Tech
 & S.O. material only. Also, Demmer's later meeting with A.D.
 & H.B. (Demmer & H.B. already arrived in Princeton & official
 from S.M. - but he really here to meet A.D.; other purposes of the
 trip only accidental); two or three brief statements by some
 what are drawn (W.H.) & etc (demmer) re A.D.'s
 affairs deal - taking of H.B. You had provided some
 kind of extreme in detail & had would not be happy of work.

Notes re A.B.

2. A.B. is describing effectiveness of A-Team. June & July 1946. Reunions, meetings @ having been left out of Manhattan Project, they were not machine to use, plus another demonstration of same sort as Dr. Richard Koopman; "small groups came to various meetings & their identities, and ordinary attention to them suddenly & unaccountably they were treated respectfully by high army & civil officials, given priorities on planes & railroads, a kind of all had their salaries raised from \$4000/year to \$6000, and this was followed by an incredibly stupid public's spectacle. Re Nikini (early July 1946) & also mentioned all A-story & pictures of apparently unharmed goats contentedly grazing on deck of a sea ion-ox cruiser, one of the targets.

3. A.B. - Koopman - K.F. incident - April 1947, while going to Peckhill with A.B. & working in all's car. Previous A.B.'s affair with working, potential purpose, to work on A.C.M.C. project - Patent filed for workman. Incident of all's unwilling Finnish friend. A.B.'s winter diary for Koopman.

4. Re A.B. & K.F. story - August 1946 - re Fuchs's being detained in England. H.B. believed it was true & later related it to both H.K. & Arthur man. Fuchs's relief under & heard it was possible & that K.F. was well & had given a few weeks previous been in contact with S.U. a guest in Britain. Whole business probably part of all's prying into H.B.'s affairs as to the old gold on hand - and I fell for it, too.

See Herald Tribune (end of July)

5. A.B. converted idea of Republic Chemical Co (idea as originally not working for Hendrick but was proprietor of Republic Chem - H.B. had several great versions, all different, of Chubby Delaney(?) & Moton's Seattle and Sidney) & filed told H.B. of this at Peckhill some after the memorial day.

6. Why'd Dept. stuff of A.B.
 (1) Fragments of A.B. taken by H.B. & held off
 (2) Faber in the 4th Court (out of investigation agent to terms for it), a sizeable amount of material - took 6 men several days to locate & move it all. Part of H.B.'s effort @ obliteration, all memory of previous work.

- a. H.B. going to Technical Library in N.Y.C. - Engineer club or N.Y. Public Library - time 3 P.M., had got as far as I could go in lab & needed to consult chemical literature. I drop piece of memorial box 1947. Had tried to call A.D.A. office in L.I. City, but had got busy signals. I turned off at office to see if there was anything further that A.D. wanted me to look up, plus fact that I wanted to tell him how work was progressing.
- b. met Col Farrell as I was crossing at the office - middle of rd. - "delegitation." Did I know that Soil men were with A.D.? "No" I had to do with internal M.A. men.
- c. A.D. in office. Came to meet H.B. & took me by arm, grasping my wrist. Conversation:

(1) A.D. "I see you." I was still there. They know everything; they know all about me. Look. They know you were a courier. They even had pictures of you & I together. Look Harv, you've got to look me up. I'd like coming to see you that afternoon. (later, you know) what?

(2) H.B. "No, I never actually met him."

(3) A.D. "Well anyway, you've got to say you did to back up my story; and now I told them all and I." A.D.'s description of John Collier (nick): Receding forehead, curly hair, whiskered face, very thin. My above you a picture of him. Make up a story, any story at all & tell them that he introduced you and whatever you do, don't admit seeing any documents unless to me. I got you.

(4) "Nobody is on my side to A.D. & never with the car. I never saw anybody around. Don't del on the agents that are spot together. I provided them I would don't get in touch with you."

d. H.B. returning to A.D.A. lab. Chamberlain. Low costed story on my (own private library here).

e. City of Shannon & O'Brien - looking right at me but glances all around but Shannon asked - "do you Henry hold the deal?" They never know me, never had any pictures of me & I together, & I had never heard of me till they got there any more - to take the deal off himself.

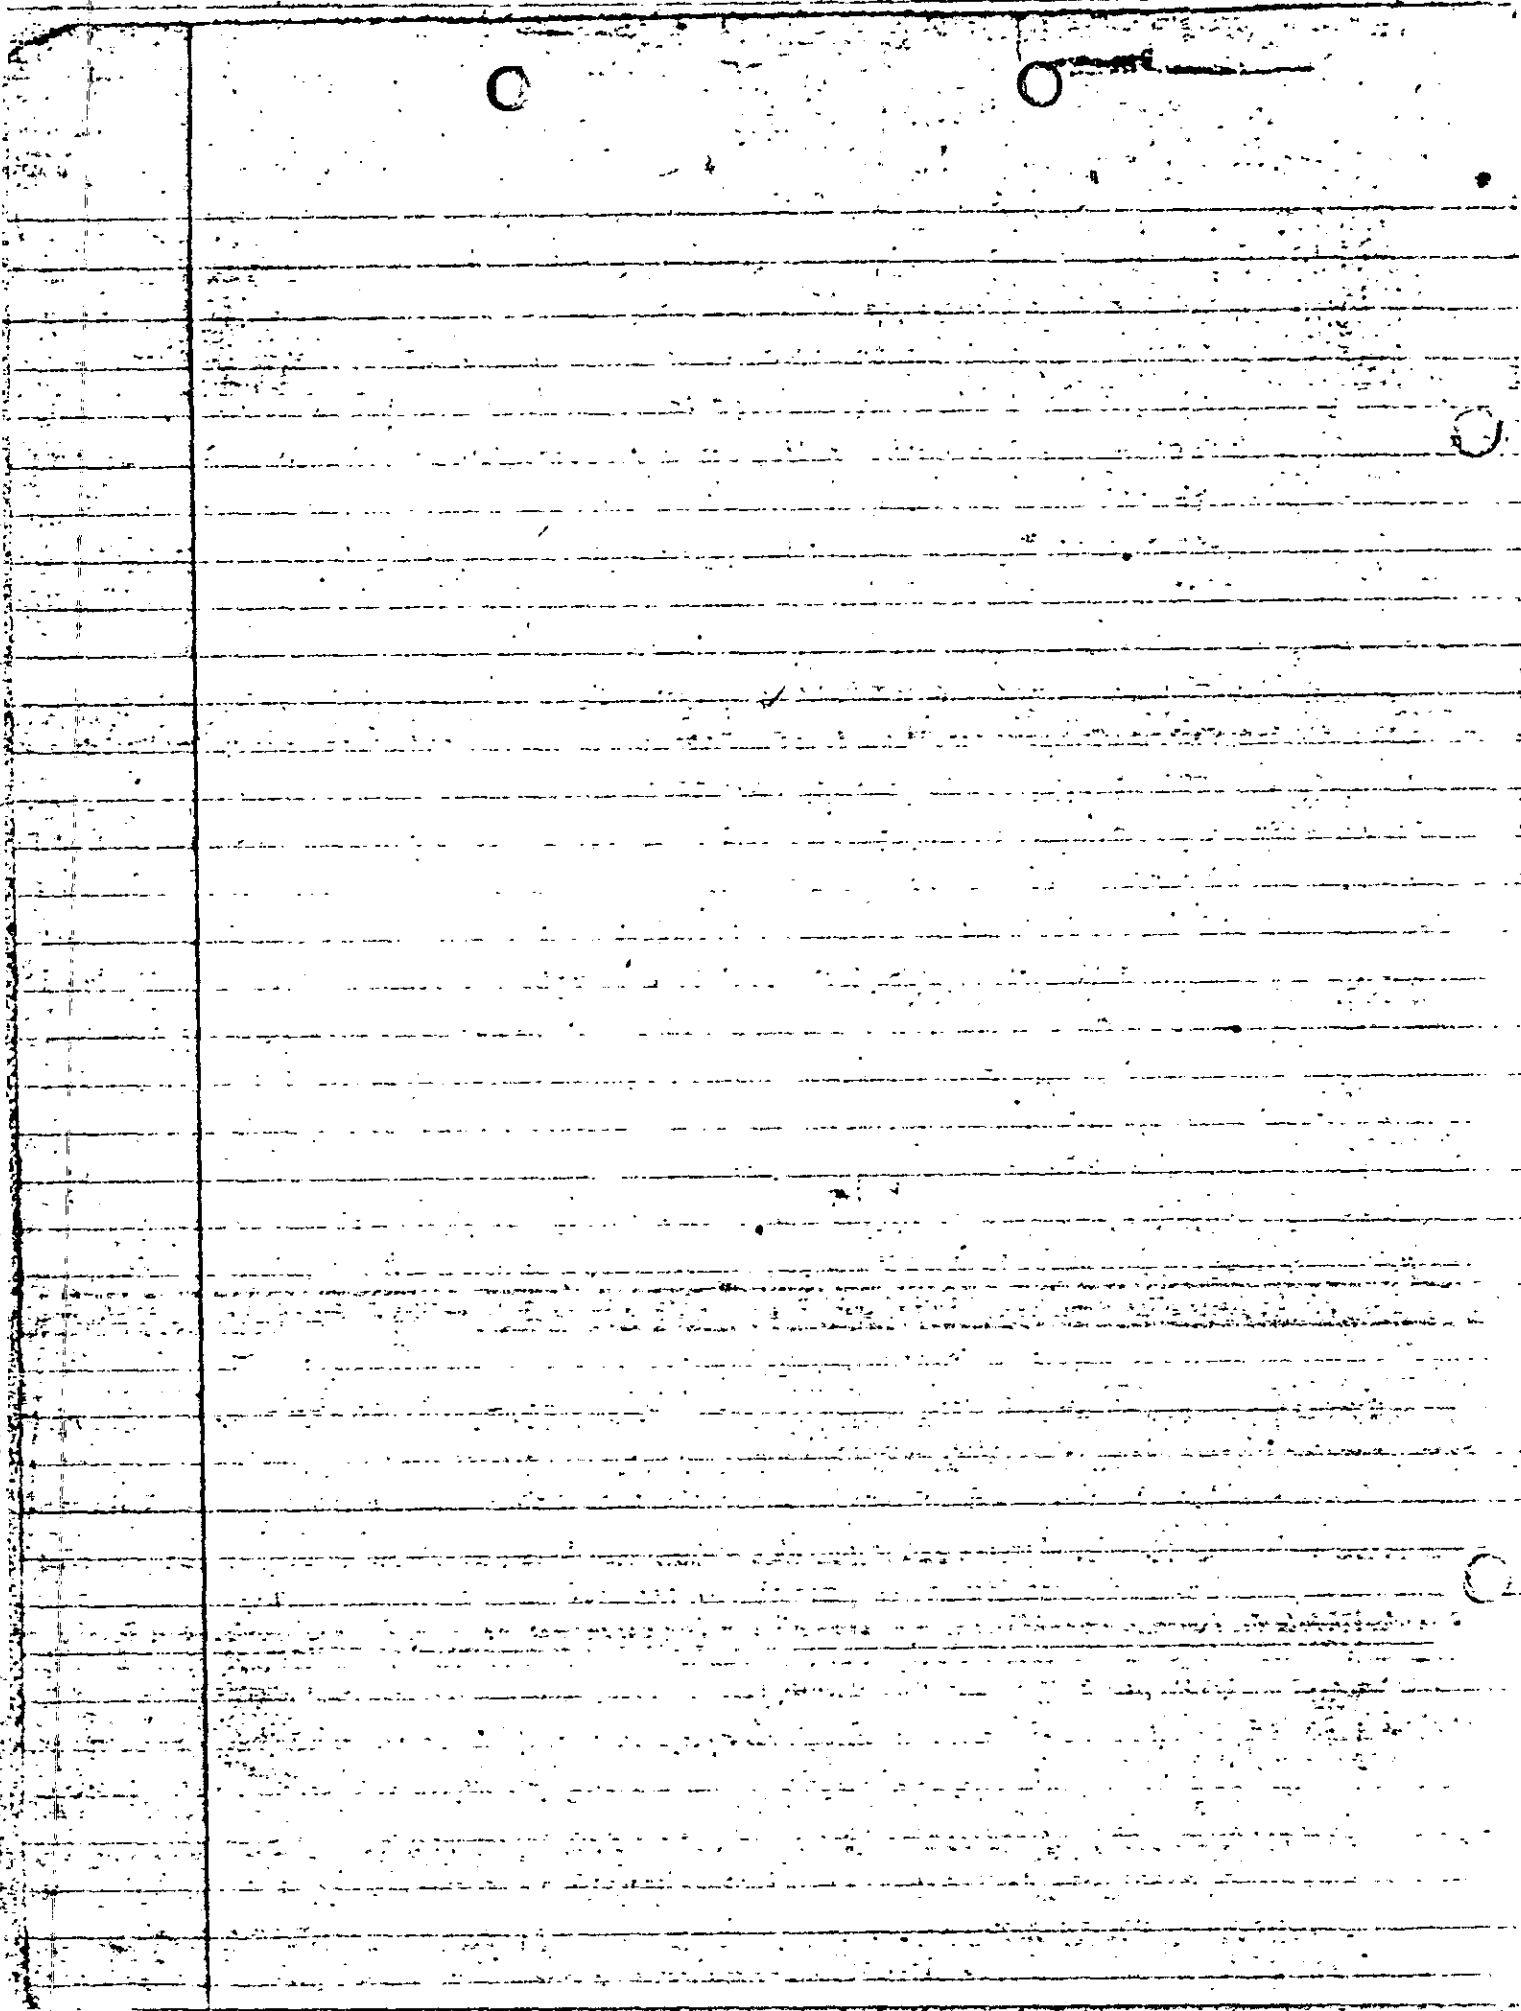

f. H.B. introduced self. First time meeting - and also I covered myself & all aspects

1) Don't had to be aware of facts, so I reviewed them

2) No bread with AB - also worked 18-20 hrs 1 day - all
L. letter - we talked over last night

3) re Na cat - accepted drugs. so as not to offend A.B.
- also forgot to tell some aviation stuff
; meant to but never did. Exhaustion.

4) re anonymity - poor way to collect it.

5) How conduct self before court - talk loudly & in a clear
so you can be heard

6) why remember things - New Orleans - now

7) do chapters - could hardly forget such a vital incident
in my life

8) Fields Kogon, amirals, my mind - die with A.B. & do work
before during & after
afterwards - went back to letter
working against deahone

9) I think I did done okay with re remembering as
much as I could
with 4 acts

10) re A.B. - rough draft: one part something on paper, it's
a good memory aid. I. U. must have mentioned deahone
RO & taxi. Rich? Yes is now, but so now during thing I did. Part
only Ed. agents could have been apprehended.
+ other agents of deahone

11) pride self on fact that no deal - but see when mentioned
- not too long when slightest offer ever been made.

12) re Sam R. ph 63 - still decided to conceal identity -
realized from first that I would deal
A.B.

13) still anything - took info - S.U. -

14) He accused - gullible is better word

15) Intentionally working @ H.G. - avoided her on acct of her victims
Thames. Would date @ late summer of '43. all added to

16) H6 talk 6 P. (with) why calling. never weighed in there @ ASA
Too busy 19-20 best day all.

17) discussed card - just related my story, that's all.

18) why I kept up with AB after '49 - Charles' visit
his wife moved feelings - gratitude AB for not out doing
I had other ways - but wife not able to do it.

c. - a friend & I was fascinated by his ability
to tell out their story - state of mental exhaustion - to make
some N.Y. called him

19) He Dough - interested only in going down to Ross & was
4 P.M. (if before last 49, include more), way I
worked for most. without any should be said about
Smith.

20) Libraries - got info during day (literature search) & then
worked @ lab till early morning, as always with
realize importance of references. Look over of
with

21) Re living with H6 - no way for most. & hated it -
slept on cot in kitchen & sleeping up late
(black-black) also drive for history, so got out as
soon as possible.

22) meeting of H6
a. said that I should not get out of way to be nice to
Tong & was - wished others could be that way
d. C.P. friends - "anonymous blobs of names" on
survey manual that is C.P.

23) push -> 5 & 6 compare etc.

4) No H.A.A.A @ Phil McCord ³
 { was never going back during my
 stay in ^{air}
 was called at home due to death of
 mother.
 Phil was unimpaired -
 but off two great jobs

5) Walter Quick & Elizabeth on floor of lab

6) T.D. - FBI got thoroughly into this & made out a strong
 bill. Was working on this in 1957 at the Richard
 Nixon to security of U.S. the end.

7) I am the decision re exp. - "what does ^{damn} Frank think he
 accomplishes by standing on a corner selling D.W.?"

8) Loyalty A.S.A. - did not wish to lead a firm into which
 so much work & effort to heart break had been put by
 various members of organization

9) re matter - If this will do H.G., would have good bond
 in Sept '47. As it was, I only identified A.S. work
 (Heron). Also say, plus circumstantial -
 H.G. would have debt of \$ & back pay too.

10) re Emmerich; A.S. filed, & I, very detached (1/5/47
 1/6/47 @ A.S.A.) detail slip. A.S. was always paying

11) Long talks - not yet at - A.S. on A.S. & his troubles
 ment H.G. the principle by
 telling in his troubles first

12) A.S. & H.G. - H.G. not that well known

13) re Legthorn - remaining filed had lot of the
 A.S. (from my)

14) A.S. also had handwritten hard-headed business
 & legal papers.

15) re New York - A.S. company that disclosed.

16) re L.P. @ home - Falling of guilt (know I was
 committing the crime - but it's and satisfied
 means); so, attempt to whitewash memory,
 + I track around

17) How I got off from work for trips - other two
 ^{pages} ^{and} ^{on}

will.

3) He looks around (with (re no cell))

39) He is hated by both sides - FH Rowley & Navy yet got
up, & had a job @ Mile Navy Yrd - would had to do
as well till July. But was taken in by story
of Kaul job - also believed He to be
said he could not undertake job without
this was a physical & extra element.

40) '44 & '45 - He for too busy - especially with full-time
job & look's unwilling to worry about clearing up
during these yrs.

41) Able to get subsidy from authority
order of 40-50 amount
work @ little responsibility
Idea of obtaining entry
to plants all over US
& also free to go with
secret. (only a little
authority).

42) He is complex AE - rarely took info from staff & send
it to Sam or from Corridor.
while others work of indictment, not AE & AF not a member

43) At X-11 & Fed - not authority of all Dept's: down level
demanded clear people who would be kind to
what's said out there - FBI is big, not really
acted.
they know all about

44) Why AE was dropped -
K.F. work
- would not get hit big and complex -
- that's that

45) He as C.P. member - all told and other in firm wouldn't
take it - so went along & said I was.

46) Why I forgot things
- mental state of exhaustion
- working 60-70 hrs a week @ PSC
& trips re espionage work (on
several occasions states I work 70 hrs @)

47) CWR Mission finding Redwood complex -
every body wants to get into the act.

48) He notes @ Tombs - write out things for
F O M H

(4) told AP when I came in '46 that I did not see
US in clear. Again explanation - as why I forgot to
tell AP

making '46
Q ASA.

(5) as to all told me of what is actual situation in
U.S.

(6) corrected in 11 yrs of life & death - it's a wonder
I even didn't come out of my ears

(7) amended statement - enlarged on previous statements
all July & with dates - Not AP call
anyhow.

Defendant's Exhibit N
Design of a Urea Resin Plant

1. The material contained in this article is in the nature of straight forward chemical engineering calculations — and of a very elementary kind at that.

2. The reasons for the choice of certain materials for bearings, stuffing boxes and other features of design may constitute some feature of novelty — but it seems to me that these are part of the daily problems encountered by design men.

3. There are hundreds of resins (as a generic name for commercial high-molecular weight materials = plastics) but the Synovar blue print has absolutely no specification on it as to what resin it is proposed to manufacture in the equipment.

4. I do not see how Abe could have designed a urea resin plant for plywood in 1941 when, in 1946, he had to substitute an American Cyanamid resin (in place of the one that Tang and Wan had seen demonstrated in Abe's lab) for submission to the U.S. Testing Laboratories in Hoboken. This was just before I came to New York. When the Chinese tried the process in 1947 in their own lab,

Batch-continuous Process for Buna-S

1. Lists of various pieces of equipment are not given here — but they are on the blue prints.
2. Some of the details of the process are given in this article but not to the full extent described in Abe's report which I saw on the stand — and not to the full extent given in the report which I handed to Sam.
3. In general one can say that the technique for the manufacture of Buna-S has been described in this article, and some of the problems and the features of the design of individual items of equipment have been discussed, but no chemical manufacturer would ever set up a plant with only this report in front of him; he would want:

a. Complete operating data

b. The general layout of the plant as applied to his building — or to one he was proposing to construct

c. The design details of each individual piece of equipment

d. A demonstration in either a pilot (small scale) plant or an opportunity to work for several months (say) in a plant already in successful operation — so he could see for himself

e. A report on the

General Comments

all these exhibits H and N there are plus for other Brothman publications and for his theories on the design of molding equipment. All of these articles appeared in the McGraw-Hill publications - of Chem & Met., I know this; In general there are many articles published in it which are intended for self-advertisement. Its Am. Chem. Society counterpart, Industrial and Engineering Chemistry, is far more fully about the sort of articles they publish and in general the work appearing in I. and E. C. is of a higher scientific caliber and the data is more fundamental in nature.

One man submitted an article to I. and E. C. but he had a quarrel with the editor & I do not believe it was ever published.

The first paragraph represents what may be a very controversial matter, but I'll be dramatic and say that I "know" I'm correct in my general opinion.

all articles on mixing equipment

1. The article dated May 1945

a- abe received a letter from a South American (Peruvian, Bolivian?) chemical engineer praising him for the equations & relating that the writer had tried certain of them out & had got marvellous results. *Time early 1948*

b- abe spoke at a symposium held at the University of Penna. The director of this get-together was a man called Molitad - he's still at the U. of P. at this meeting abe was severely criticized for his visionary theories.

c- Dave Buslik told me that he had tried several of abe's equations & they had not worked at all - without any prompting from me, he characterized abe as a "con man" - and said that the article on mixing had that desperation air of trying to sell something. Dave also told me that he had spoken to a prominent chemical engineer at DuPont and the latter had said that the DuPont organization had encountered some sad experiences in trying to apply abe's formulae to practical problems.

d- The autoclave reactor described in this article never worked - we had to get a U.S. Intellectual report from Washington & had to use mine

oxide well, & the exact conditions as specified in the report before we could demonstrate a satisfactory yield. Before this Mr. Herson had worked for two or three months with only ^{5%} 10% yields to show for his efforts. Using the German data I obtained about an 80% yield. Bob had searched the literature & had obtained articles from all sources reporting the alleged successful operation of such plants - none of these methods worked; possibly the articles, including Canadian & Russian work, were deliberately misleading. I do know toward the very end Tang was becoming convinced that a process for the production of acrolein from acetylene was just not commercially feasible.

2. To me a mathematical approach to the problem of mixing seems a very logical one & I know it also appealed to Tom.

Exhibit 11

The details of the construction of this piece of equipment could have been arrived at by any competent design engineer.

I. SIGNED STATEMENT OF HARRY GOLD:

HARRY GOLD was interviewed by Special Agent ROBERT G. JENSEN, Philadelphia Field Division, and the writer, on May 13, 14, and 15, 1952, at the United States Penitentiary, Lewisburg, Pennsylvania, where he is now serving a thirty year sentence for Espionage, imposed on December 9, 1950, by the Honorable JAMES McGRANERY in the United States District Court, Philadelphia, Pennsylvania.

GOLD, who has an amazing faculty for detailed recollection and who could, on cross examination, give testimony of convincing nature regarding the positiveness of his recollections, furnished the following signed statement:

May 15, 1952
Lewisburg, Pa.

"I, HARRY GOLD, do make the following voluntary statement to CARL A. BETSCH and ROBERT G. JENSEN. These men have identified themselves to me as Special Agents of the Federal Bureau of Investigation. I have been told and know that I am not required to give or make any statements. I also know that any statements I make may be used against me in a court of law. I have been told and know that I am entitled to benefit of counsel.

"These men have asked that this statement cover my present recollection of the matters set forth hereinafter. I have carefully reviewed these events in my mind, and can testify, if called upon to do so, as follows:

"Beginning in late 1935, I began to serve as an active Soviet espionage agent in that I took industrial information from my place of employment, the Pennsylvania Sugar Company, Philadelphia, Pa. and gave this information to my Soviet espionage superior. I continued in this task of transmitting information taken from my place of employment until the Spring of 1938.

"At this time I was being handled by my third Soviet superior, a man I knew as FRED. FRED was quite persistent in his attitudes towards me in that he continually pressed me for industrial

CIN. 65-1724
CAB:CMC

information. He also asked me to seek other types of employment, for I had delivered by this time most of the information of industrial value at my place of employment. I can also recall that he (FRED) asked me on many occasions to submit biographical sketches on people that I considered possible recruits for Soviet espionage. I know that I submitted to FRED some biographical sketches on non-existent people in order to allay the persistent hounding he was giving me.

"However, in or around April of 1938, I told FRED of my desire to go back to school to complete my education. FRED objected to this idea of mine stating something to the effect that my contacts with the industrial world would be broken off.

"In a later meeting with FRED in late July or August of 1938, somewhere within a two week period around the LOU AMBERS-HENRY ARMSTRONG fight of that year, FRED told me he wanted me to go to college. I recall this meeting quite clearly. FRED called me by phone at my home in Philadelphia and asked me to come to New York City immediately. The night was a rainy one and rather miserable. FRED bawled me out for not producing contacts for him or additional information. After this bawling out, FRED told me that things would change for the better and he now wanted me to go to college.

"He told me 'there is a government official located in the midwest' from whom I was to get information. FRED said this particular setup required my attending the University of Cincinnati. He was very specific about my attending the University of Cincinnati. He told me that there would be plenty of funds available for my education.

"I would like to state that prior to FRED's change of attitude and wish to have me attend the University of Cincinnati, FRED wanted me to go to the Massachusetts Institute of Technology. This I declined to do for various reasons, principally, that I could not account to my family for the funds that would permit me to enroll at M.I.T.

"I was unable to enroll at the University of Cincinnati under the conditions I had hoped for. The University of Cincinnati would not give me credit for the courses I had taken in Evening

CIN. 65-1724
CAB:CMC

School at the Drexel Institute of Technology. I was also told that the credits I had earned at the University of Pennsylvania were not acceptable. I further did not want to take the six year cooperative course as offered to me by the University of Cincinnati.

"At the suggestion of a co-employee at the Pennsylvania Sugar Company, I did enroll at Xavier University in Cincinnati, Ohio in September, 1938. This co-employee had no knowledge of my espionage activity at that time nor did he have knowledge of my true purpose in wanting to go to school in Cincinnati.

"After my enrollment at Xavier University, there was a series of meetings with FRED. One of these meetings was held in New York City and another two meetings were held in Cincinnati. At none of these meetings was the purpose for which I moved to Cincinnati discussed. I believe FRED at one of these meetings told me to get established first and we would discuss the purpose of my going to Cincinnati later.

"On Thanksgiving day of 1938, I received a telephone call at my rooming house. This call was from FRED. He asked me to come downtown immediately. I explained to him I was not dressed and my rooming house was almost an hour's bus ride from downtown Cincinnati. I went downtown and met with FRED. He told me at this time I was now to follow out the purpose for which I had been placed in Cincinnati, Ohio. I was told to go to Dayton, Ohio, by FRED who said I was to resume contact which an Agent, STAN, had once had with BEN SMILG, an aeronautical engineer at Wright Field."

"I suggested to FRED that I go to Dayton, Ohio, on the following Saturday. I did not so state, but I had planned to attend the Xavier-Toledo football game and to accept my landlady's invitation to Thanksgiving dinner that day.

"FRED said 'No, you have to go this afternoon, the man is waiting.' I walked with FRED to the Union Station at which place he gave me the address of BEN SMILG in Dayton, Ohio. I can not recall whether he gave me this address in writing or whether I wrote it down at his request. I no longer have the slip of paper upon which the address was written but I recall the address as 307 Oxford Street.

CIN. 65-1724
GAB:CMG

"FRED also gave me a letter and a white box containing a new leather wallet wrapped in tissue paper. He identified the letter as one from STAN which I should give to SMILG as a recognition signal. FRED said the wallet would serve as a gesture of friendship to SMILG.

"He put me on a train for Dayton, Ohio, that afternoon and I arrived there about one hour or so after leaving Cincinnati. I took a taxi to the SMILG residence on Oxford Street as this was the first time I had ever been there. This was about 4:30 or 5:00 PM.

"I knocked at the door of 307 Oxford Street and a man answered it. I said 'I've come to see Mr. BEN SMILG.' The man said 'I'm BEN SMILG.' I said 'Oh, fine,' and started to walk by SMILG, who was still partially blocking the doorway. I then said, 'I come from STAN' or 'I bring greetings from STAN.' SMILG then said 'Oh' or 'Oh yes' and invited me in.

"The door opened directly into the parlor where I gave SMILG the letter and the wallet and told him my name was HARRY GOLD. There was here present, SMILG's parents, an elderly couple who were friends of the SMILG family, and another family friend, a man who worked at Wright Field. DAVID SMILG, a younger brother of BEN, entered the parlor a short time later. BEN told his parents, 'This is HARRY GOLD, a friend of STAN's.'

"BEN's parents were pleased over the news of STAN and asked me how STAN was and what he was doing. I said that STAN was fine and turned the conversation to another subject. I did not know STAN and FRED had told me nothing about him.

"I had read the letter before I had given it to SMILG. It was a simple letter of introduction with the request that BEN do what he could for the bearer. The letter was signed merely 'STAN.'

"I also remember I was somewhat ashamed of the appearance of the white box which contained the wallet. I stopped in the men's washroom in the railroad station at Dayton and tried to clean it up a bit with an eraser. I also rearranged the tissue in which the wallet was wrapped. I noticed nothing else in the box or the wallet. This I did before I went by taxi to the SMILG residence.

CIN. 65-1724
CAB:CMC

"The wallet was a long, narrow, wafer thin, fold over leather wallet. SMILG's father admired the wallet very much. I judged from his remarks that he had been in the leather goods business or had a professional knowledge of leather.

"I sat and waited for BEN SMILG to take me someplace as I had expected him to be awaiting my contact for espionage purposes. It was obvious that we could not talk in the parlor with the other people present. BEN made no move of any kind. I felt I had to say something so I said I lived in the East.

"The guests of the SMILG family left and a neighbor came in for a short time. I started talking about going back to Cincinnati that night and finally BEN's father suggested that BEN drive me to the bus station.

"BEN drove me alone to downtown Dayton and stopped at a park near the bus station. I here said to BEN 'now that we are here alone we can talk more freely.' BEN made no response. I said 'STAN said you and I would be good friends.' BEN mumbled something in reply. I gave him my Cincinnati address and the phone number of my landlady, Mrs. ALIS BROOKS. BEN held the paper with this information on it as though he did not want it. BEN said 'Are you working there.' I said, 'No, I am going to school. I will be there two years and will be available to you at all times.' BEN froze up completely and I got upset. I told SMILG I would get in touch with him again. SMILG made no reply and he seemed glad I was leaving. I left the car, walked to the bus station, and caught a bus for Cincinnati. In Cincinnati, I had a late supper about 9:30 P.M. at Shevlin's in Cincinnati.

"The following Sunday, I kept a prearranged meeting with FRED in Middletown, Ohio, at the railroad station. FRED and I walked around town in the vicinity of the railroad station. I had lunch with FRED in the same general area. In reply to FRED, I told him that I had been to see SMILG, but I didn't think we had the right man for I didn't think SMILG knew what I had come for. I told FRED I thought something was seriously wrong.

"FRED told me I was wrong and that SMILG was showing commendable caution. He said everything was fully arranged and I need merely to get into the good graces of SMILG and obtain his confidence. SMILG would then give me information as he had STAN.

CIN. 65-1724
CAB:CMC

"I said I was not going back to SMILG. FRED threatened me by saying he would send a letter exposing me to the 'good Fathers at Xavier University' if I did not comply with his instructions.

"I took the bus from Middletown, Ohio, and returned to Cincinnati.

"My next contact with SMILG was before the Christmas holiday of 1938 at SMILG's home in Dayton. I learned from BEN of his planned trip to Philadelphia, New York City and Boston. I told BEN I lived in Philadelphia and would be there myself over the holidays. I carefully printed out my home address and phone number in Philadelphia and gave it to SMILG. I asked him to be sure to look me up on his trip East. SMILG appeared more cordial to me and I felt FRED had been right after all. SMILG again drove me downtown to an area near the bus station.

"I met with FRED in New York City during the Christmas season of 1938. FRED told me it was likely that SMILG would now hand over information at our next meeting or at least prepare a set up for the transfer of information.

"In January of 1939, I made a telephone call to SMILG's home from a phone booth in Dayton, Ohio. I believe DAVID SMILG answered and after talking with someone in the background, told me that BEN would not return home until late that night.

"I went to Dayton a couple of days later and saw BEN in presence of his family at their home. I asked BEN why he hadn't gotten in touch with me while he was in Philadelphia. BEN said he had had an automobile accident while enroute near Lancaster, Pennsylvania. BEN said he had had a narrow escape with his life and his companion, a male, needed hospitalization from the accident. He showed me a picture of the damaged car and said he had not gone through Philadelphia because of the accident. I tried to wait the family out so I could talk to BEN alone. He gave me no opportunity for this and I left the house by myself. I told BEN I would get in touch with him again.

"I met with SMILG again in March of 1939. I arrived at the SMILG home unannounced about supper time. SMILG invited me to

CIN. 65-1724
CAB:CMC

attend a lecture somewhere in Dayton. The lecturer was LUDWIG LEWISOHN, who was speaking on Zionist problems. His lecture was impressed in my memory as LEWISOHN, in the course of his speech, made sharp and even insulting remarks relative to Christians. SMILG and I commented about such remarks in view of the large number of Christians in the audience. A friend of SMILG's, name not recalled, who was a ham radio operator, went with us to this lecture.

"After this lecture pledges were solicited for the Zionist movement. I signed a pledge for \$5.00 giving my name and Cincinnati address. I gave this pledge to a plump Jewess who was a friend of BEN. I never received any bill and never paid the pledge.

"I met with FRED in April of 1939 near the Netherlands Plaza Hotel in Cincinnati, Ohio. I told FRED we should do something to get this thing with SMILG started. FRED suggested I talk to SMILG of the benefit to the Jews in aiding the Soviet Union.

"I met with SMILG again at his home in Dayton shortly after my meeting with FRED. I do not remember being specific with SMILG at this time. I do not think I brought up the points suggested by FRED when I talked with SMILG. I can recall only that nothing of value resulted from this contact.

"After examinations in June of 1939 I saw SMILG again at his home in Dayton. I propositioned SMILG in rather a weak fashion on this occasion. I also told BEN that the Soviet Union was a great bulwark in the fight against Fascism and needed help in this fight. SMILG evaded the subject I was trying to bring up.

"At one of my meetings with FRED right around this time, FRED said that I perhaps did not appear reliable to SMILG because of my youth and apparent immaturity. FRED told me again to establish a close personal relationship with SMILG and impress him with my mature viewpoints. I was told by FRED to enroll for summer school so that I could stay in the area and cultivate SMILG.

"I now remember I did not go home after summer school was finished in the first week of August 1939 because I hadn't seen SMILG yet. I went to Dayton, Ohio and on this meeting I gave SMILG a

CIN. 65-1724

second letter from STAN, which FRED had given to me. I believe the contents of this letter were to the effect that BEN should give to me the same type of information he gave to STAN in the past. FRED told me to get the letter back from SMILG. SMILG took the letter from me while we were in the house and walked upstairs.

"I heard the toilet run and BEN came back down. BEN said 'You don't know what you are getting into, be careful.' BEN was tense and agitated and I became frightened. I left alone without the letter. I felt I needed a few drinks which I had at a bar across the street from the Biltmore Hotel in Dayton. I felt too upset to go back to Cincinnati that night. I stayed overnight in Dayton in what I now recall was the Hotel Gibbons, returning to Cincinnati the following morning.

"I think I saw SMILG again in October and again in December of 1939. I can't recall what transpired. I remember I was ill at ease with BEN and had a natural reticence about seeing him in this period.

"I know I must have seen FRED again sometime during this period but can not recall when, where, in Cincinnati, or how many times.

"I next saw SMILG in January of 1940. I fix this date by remembering I boasted of the glorious Soviet Union. SMILG scoffed at this for the Red Army was then bogged down in the Finnish War. I did not proposition SMILG at this time.

"From January until March of 1940, I did not see FRED. In March I met with FRED and he told me to proposition SMILG very plainly at my next meeting. FRED told me to ask SMILG directly for information. FRED also told me to prepare a letter using the phrase that I was successful or unsuccessful in selling my car to indicate success or lack of it in dealing with SMILG. This letter I was to mail to an address in Brooklyn, New York.

"I met with SMILG at his home in March, 1940, at Dayton, shortly after my meeting with FRED in Cincinnati. I complied with the instructions given me by FRED and asked SMILG specifically for information. I believe I asked SMILG for any technical data

CIN. 65-1724

about production or performance of any aircraft engine as produced by the military. I also told him that the information did not have to be drawings or blueprints. SMILG said 'You don't know what you are fooling with, you better get out as soon as possible.' SMILG was agitated and somewhat tense at this meeting but did not agree to furnish me information.

"I left SMILG in Dayton (this was on a weekday and in the evening) and returned to Cincinnati. I composed the letter I had been asked to write, showing my lack of success with SMILG.

"In late April of 1940 I got a call long distance from FRED telling me to come to New York City. I was given details of how to meet my next Soviet espionage superior, JACK.

"I met this new Soviet espionage superior in the lobby of the Hotel New Yorker as instructed. This new contact asked about SMILG. I told him that SMILG had rejected me. JACK then said something to the effect that SMILG would come around and I should visit SMILG again. I stayed at the Hotel New Yorker that night and left for Cincinnati the following afternoon.

"I phoned SMILG at Dayton from Cincinnati as soon as my examinations in June of 1940 were over. He seemed more cordial than in the past. This surprised me and because of this I will remember the call.

"I went to Dayton right after this call to see SMILG. I met him at home and we took a walk together in his neighborhood. I told SMILG I was leaving Cincinnati to go back East to work. I told him I could set up a system whereby I could meet him anywhere he wanted. I used the towns of Cleveland and Indianapolis as examples. I said the transfer of information from him to me would only take a minute and that within a matter of a few minutes later someone else would pick up the information from me. I further told SMILG that if he preferred, I could have someone else contact him to get this information. I also made the proposition of payment of money to BEN as well as the possibility of sending his brother DAVE to Massachusetts Institute of Technology.

CIN. 65-1724
CAB:CMC

"SMILG told me I did not know the extent of military intelligence to counteract efforts to obtain information. SMILG said, 'For all you know, you may have been watched from the very beginning of the time you first came to my house.' I told him there was no indication of such.

"SMILG then told me he knew of a case where an engineer in his office was taken away by two intelligence officers and had never been seen again. I was told by SMILG I didn't realize what I was letting myself in for and that I had best get out of it. I told SMILG I was nearly 30 years old, that I had been out in industry, had met people, did understand what I was doing and thought it was a good thing.

"SMILG was outwardly upset, but solicitous in the nature and manner of his remarks to me.

"I returned that night to Cincinnati and left shortly thereafter for my home in Philadelphia, Pa.

"In July of 1940, I was taken over by a new Soviet espionage superior, named SAM. SMILG was mentioned casually by SAM in the summer of 1940. I was told to go to Cincinnati and renew acquaintances with SMILG. In October of 1940, I was supposed to go to meet with SMILG but actually I never went. I prepared a false report on this trip and gave it to SAM.

"Shortly before Christmas of 1940, or right after New Years day of 1941, I went to Cincinnati. I arrived there on a Saturday and on the following Sunday, I went to Dayton to see SMILG. I told SMILG of going to Wisconsin on business for my firm. I told him I was to see Doctors SNELL and STRONG at the University of Wisconsin on microbiological assays.

"I did not come right out with a proposition to SMILG but said something about STAN being anxious to see him and hoping to see him soon. I got no response from SMILG. I then told SMILG that STAN was most anxious that he furnish me information from Wright Field in accordance with the talks that SMILG and I had had in the Spring of 1940.

CIN. 65-1724
CAB:CMC

"SMILG told me I was totally mis-informed as to the relationship between STAN and himself.

"Prior to SMILG's telling me that I was mis-informed about his relationship with STAN, I also told SMILG that he had given information to STAN in the past. I told SMILG he was to give me information in accordance with the manner in which he had furnished information to STAN. I also asked SMILG if 'STAN hadn't given him money for this information. SMILG told me he had never given STAN any information and he had never received any money from STAN. SMILG said the relationship between he and STAN was that they had been friends at M I T and he had tutored STAN there.

"I left SMILG in Dayton with the statement that I would be back on business and would see him again. I returned to Cincinnati by bus and met with SAM near the Hotel Gibson on the north side of Fountain Square. During my meeting with SAM I gave him an account of what had transpired at my meeting with SMILG. I left SAM in Cincinnati and returned to Philadelphia by plane.

"A few days after my return to Philadelphia, I took a written report on my last contact with SMILG to SAM in New York City.

"I saw SAM in New York City a few days later as planned. At this time SAM said 'That "once and for all, we are going to pin SMILG down and make him come across with information. We are going to show him right to his face where he is lying.'" SAM said this would be done by means of copies of actual reports that BEN had furnished plus receipts for money which BEN had taken.' SAM also said the originals were not presently in New York City but photo-copies were being made and had been sent for.

"SAM and I arranged to meet and did meet on a Saturday in early February, 1941, in New York City. SAM, at this meeting, gave me a brown envelope, which he said contained copies of several reports BEN had written, plus copies of several receipts for money.

"SAM told me I had to leave immediately for Cincinnati, Ohio, over my protestations that I had promised to be home that evening. SAM even took me into the lobby of the Hotel Edison and made reservations for a plane leaving that evening for Cincinnati on American Airlines.

CIN. 65-1724
CAB:CMC

"I took the plane alone, and arrived at Cincinnati, Ohio late that evening. I registered at the Hotel Gibson and before going to bed met by chance a classmate of mine at Xavier University, one DICK SCHMITT, in the lobby of the Hotel. We had several drinks in the hotel bar, and I told DICK I was on my way to Madison, Wisconsin on business for my firm.

"The following morning, I went by bus to Dayton, Ohio, and arrived at Dayton, Ohio, about 10:00 AM. I went immediately to SMILG's home on Oxford St. BEN was still upstairs when I came in and when he came down, I was offered breakfast with BEN. BEN's mother cooked his breakfast, and I accepted a cup of coffee, and possibly a roll, while BEN ate his breakfast.

"BEN and I then went into the living room alone. His mother remained in the kitchen. His father had been there earlier and had left. I cannot _____ DAVID SMILG's whereabouts.

"I told SMILG he would recall our last conversation concerning the nature of the relationship between him and STAN, and to bear out what I had said that 'STAN wanted me to show you these,' I pulled the photo copies of the reports out of my inside coat pocket and showed them to BEN. I believe I purposely kept them in my hand, as SAM had instructed me to make sure BEN didn't destroy these papers.

"I then said, 'There are also these' and took the copies of the receipts from my inside coat pocket and showed them to BEN in the same manner.

"BEN barely glanced at the reports and drew a deep gasp at the sight of the receipts. His hand shook as he made a gesture as if to take the receipts and then withdrew his hand. He became obviously angry and in great agitation, burst out as follows.

'You don't know what you've done, you should never have done this.' 'Do you know what I ought to do, I ought to call military intelligence right away.' With this, SMILG made a gesture, as if to step over to the phone, which I think, but am not sure, was in the dining room on a low table.

CIN. 65-1724
CAB:CMC

"SMILG here said, 'In fact, I was going to do this the very first night you came around here, but I hesitated because you were Jewish and I was Jewish, and I thought it would cause an awful reflection on the Jewish people.'

"I said nothing, and SMILG somewhat regained his composure. He then said 'The receipts are for tutoring, and the reports are school work in aeronautical engineering in which I tutored STAN. They represent things which have been long established in the field and there is not the slightest thing secret about them.'

"I recall that the receipts were handwritten and of actual size in photo reproduction. They were about two inches by three inches. There were at least four such receipts, and were for months in the years 1933, 1934, and 1936, as nearly as I can remember.

"The text ran thus, on all the receipts:

'Received payment for November, 1933' (for example). All were signed at the bottom 'BEN'. All were handwritten, and were for a given month. The amounts were in the range of from \$200.00 to \$400.00, which so impressed me as being sizable amounts of money, that I now _____ a very clear recollection of same.

"The reports had been reduced in size in photo reproduction to where they would fit comfortably in a man's pocket. They were not all on the same kind of paper. There were three reports, as nearly as I can recall. Two of them were of about two pages each, and from a previous study of their context, it had been obvious that they had been taken from a report of much greater length.

"These two were typewritten, with a couple of handwritten corrections. The third was handwritten, and represented a complete report of about five or six pages.

"The text of two of them dealt with performance of aircraft. The third dealt with the elements of design of a special type wing, aimed at cutting down wind resistance. There was one graph and a number of small sketches showing stresses and strains, all hand drawn, and included in the special type wing report.

CIN. 65-1724
GAB:CMC

"Although I have never studied aeronautical engineering, I gained the impression from reviewing these reports in my hotel room at Cincinnati, Ohio, the night before that they related to military, rather than commercial aircraft. I have a very vague recollection that the third report, the only dated report, was dated around 1936 or 1937.

"The full report was not written in the accepted formalized fashion of engineering reports, but was so phrased to highlight the certain salient data, so that if it were read by a layman, its value would easily be recognized, and if it were read by a technical man, the important points would be brought into immediate and sharp focus.

"I recognized the style of this report as being very comparable to the style that I myself had employed in writing my own reports on the results of research and processes of the Pennsylvania Sugar Company, for the use of my Soviet superiors.

"SMILG was now more composed and I said 'I just wanted to show the material to you so that you could think it over. There is a big difference between what STAN said and what you told me.'

"SMILG replied that this was STAN's error and that I had been given bad information. I said that I would be on my way now, but would see him again. I went to shake hands with BEN, who looked stunned at this, and let me stand there holding his motionless hand.

"I went to downtown Dayton, Ohio, by bus and went to what I think was the Miami Hotel, where, in the men's washroom, I followed SAM's explicit instructions and destroyed the photo copies. This was done by using alcohol from a 4 oz. bottle, in my possession for this purpose, and dousing the material and lighting same with a match.

"I almost burned myself, so I finished the job by tearing the unburned remains into small bits and flushed them down the toilet. I had become alarmed at the volume of smoke from the burning. SAM had strongly cautioned me to be ready to destroy the material at a moment's notice at any time during my trip. SAM had insisted I have a bottle of inflammable solvent with me to be ready to carry out the immediate destruction of these papers.

CIN. 65-1724

"SAM had asked me in New York City the day before if I wanted 'two good boys' to go with me when I saw SMILG. I said I could handle SMILG by myself. SAM said I could either have these men right with me or in the immediate neighborhood. He accepted my decision that I didn't need these men with me.

"I had left SAM's house about 10:45 AM and took the bus to Cincinnati, Ohio, and flew back to New York City on the first plane. I met SAM at the Child's Restaurant, near Grand Central Station, about 11:00 PM that Sunday evening in early February, 1941.

"I told SAM what had happened, and he said 'good, let him rest with it for a little while.' SAM said that SMILG's explanation that the receipts were for money STAN had paid SMILG for tutoring was 'the biggest joke of all, STAN's that good a mathematician, he could have tutored SMILG.'

"STAN said 'We can show him plenty more reports where those came from, and believe me, they are not school work. He'll come across and how he'll come across; he's not going to get away that easy.'

"I met SAM again by prearrangement in March, 1941 on upper Broadway in New York City. We twisted and turned after meeting, met again briefly, twisted and turned again, and got together in a small, out of the way restaurant in the same general area. There SAM told me that things were 'very hot' and he wanted to know if I had noticed being watched at all. Then he said we would have to break off relationship for a while.

"In early July, 1941, after the attack on the Soviet Union, I again met SAM (as the result of a phone call) somewhere around Columbus Circle at New York City, and we talked about redoubling our efforts because of the attack on the Soviet Union by Germany. I asked SAM about SMILG. SAM said we would leave him alone for the time being, altho eventually we would get him to work with us. He said that a bad mistake had been made in handling SMILG, and that it was neither of our mistake, but was something that had occurred prior to our activities.

CIN. 65-1724
CAB:GMC

"I have never seen SMILG again, and his name was never brought up again by any of my associates in Soviet espionage.

"I have previously seen and have identified a photo as the BEN SMILG I have spoken of hereinbefore.

"I have reviewed the foregoing statement, consisting of this and thirty other pages, and wish to make the following additions: on page 7, at the time of my first meeting with SMILG, the greeting that I was to use was a specifically worded one given me by FRED; it was intended so that SMILG would immediately recognize me as STAN's successor in Soviet espionage.

"Also on page 7 I made no request to SMILG that he return the introductory letter; I had received no instructions on this point from FRED.

"On page 15, when I talk of staying overnight at the Hotel Gibbons, at Dayton, Ohio, I further recall another thing that I associate with this event.

"The next morning I bought a current issue of 'Time' magazine in the bus station and read it while going back on the bus to Cincinnati that morning. In this magazine there was a review of a new book written by DOROTHY DIX. I particularly remember this because the reviewer used the phrase 'ashard-boiled as the madam of a sporting house' in discussing Miss DIX's advice to young girls.

"At this same visit, at SMILG's home I arrived about 6:30 P.M. I had to wait the better part of the evening before everyone cleared out and I could get down to business and show the letter from STAN to BEN, after showing him the letter, I left no more than fifteen minutes later. It was then almost midnight on a weekday evening.

"The information I have furnished in this statement is true and I am willing to testify to the same.

Attention is drawn to GOLD's account of his visit to SMILG in January, 1940, which date GOLD fixes by recalling that when GOLD boasted of the glorious Soviet Union, that SMILG scoffed at this, for the Red Army was then bogged down in the Finnish War.

GOLD's recollection of this historical fact was later checked by reference to "The World Almanac, 1941," page 55, under a chronology of World War II, from December 6, 1939 to December 1, 1940, which for January 9, 1940, stated in part, as follows:

"In Finland, the Russians (44th Division) retreated east of the Suomussalmi, after losses. Intense cold (-31 degrees) has stopped land attacks on all fronts."

Mr. Charles P. Silverthorn,
Federal Bureau of Investigation
Widener Building
Philadelphia, Pa.

Dear Mr. Silverthorn:

I have discussed with Mr. Hamilton and Mr. Joseph Gold your request that the F.B.I. have access to Mr. Gold's safe deposit box at P.S.F.S. in order to examine war bonds in the name of Harry Gold which he mentioned to Mr. Hamilton were located there, and also to ascertain the extent of any other papers bearing on the Harry Gold case.

Our express instructions from Harry Gold have been to the effect that we are to extend to the F.B.I. every measure of cooperation. So far as his brother Joseph is concerned, he is perfectly willing to have the box opened in his presence so that his personal belongings and those of his late mother may be segregated and the Harry Gold papers examined.

Mr. Joseph Gold asks that if possible the inspection be made in the late afternoon or evening so he will not be obliged to be absent from his employment. His address is: 6823 Kindred Street, Philadelphia 49, Pa. I trust you will be able to make satisfactory arrangements with him.

If there is any more I can do, please let me know.

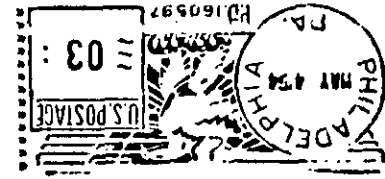

Very truly yours,

Augustus S. Ballard

Dear Mr. Silverthorn:

For Mr. Hamilton's information I sent him a copy of my letter to you of May 4th. Mr. Hamilton thinks I should supplement that letter by telling you that it is his express recollection that he was told by Harry Gold that the amount of bonds was but a few hundred dollars and that they had been disposed of to meet necessary family expenses.

Mr. Hamilton's thought in having me write was to negative any thought that any substantial amount of bonds might have been taken from the safe deposit box and placed elsewhere.
